Basic BGP Lab

Goal:

All IP addresses have been preconfigured for you.

Configure BGP on all routers, use the Autonomous System (AS) numbers as specified in the topology picture.

The ISP routers have the following loopbacks:
ISP1 Loopback0: 2.2.2.2 /24
ISP2 Loopback0: 3.3.3.3 /28
Advertise these loopbacks in BGP and ensure you have reachability from the Amsterdam router.
Achieve full connectivity, only use BGP to achieve this.
